Jaime E. Moreno, PE

Chief Operations Officer and Principal Engineer

Expertise

Water Resources Master Planning
Water Resources Engineering and Design
Water System Engineering and Design
Computational Surface Water Hydrology
Computational Hydraulics
Water Treatment Engineering and Design
Wastewater System Engineering and Design
Wastewater Treatment Engineering and Design
Recycled Water System Engineering and Design
Civil Engineering and Design
Structural Design, Analysis and Engineering
Facility Feasibility Planning
Concrete and Cementitious Material Science and Technology
Corrosion Engineering, Science and Technology
Roadway and Transportation Engineering and Design
Economic Analysis of Constructed Alternatives
Neutral Expert Report Preparation/Expert Witness Service

Mr. Moreno has more than 20 years of professional experience that combine to yield meaningful and relevant experience for a wide range of technical applications. His previous professional assignments provide a significant breadth of experience within the practice of engineering consultancy and include many successfully completed and prominent projects that reflect important undertakings with technical and managerial significance. These projects include all facets of engineering studies, planning, design, management, and design/build participation for a large variety of projects including storm water, water facilities, wastewater facilities, utility engineering, public works, infrastructure, transportation improvements, environmental, construction management, regulatory compliance and water resources projects.

Education

M.S., Civil Engineering, Stanford University, 1984
B.S., Civil Engineering, University of California, Berkeley, 1983

Registrations

Civil Engineer, CA, 40968, 1986

Affiliations

American Society of Civil Engineers
Construction Specifications Institute
Orange County Water Association
